

Affordable colouring system for 3D printed plastics

Hot Soak Box

Colouring Solution

Affordable colouring system

Combination of heat, agitation and industrial colouring solution produces colour fast parts with no excess thickness or defects

FAST

Colours MJF, Polyjet, Projet, SLS and FDM 3D printed plastics in 10 minutes. Colours polypropylene in 60 minutes.

EFFICIENT

Multiple batches of 3D printed parts can be coloured simultaneously. Colouring solution can be used repeatedly.

EFFECTIVE

UV stable, non-toxic and safe with no distortion to printed parts.

Colouring solution available in: black, red, yellow, orange, pink, green, blue, purple, brown & grey
