

Wash Station Mobile

The Quill Vogue Wash Station Mobile uses pressurised cold water to quickly and quietly remove support material from small Stratasys Polyjet 3D printed parts. The high performance Wash Station rapidly removes a range of support material from complex geometries and deep recessed areas without damaging surfaces.

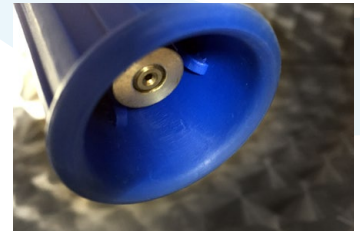

The Quill Vogue Wash Station Mobile is a “closed” system that contains 2 x 25 litre water tanks. The water is drawn from the tank via a pump, through a nozzle to wash 3D prints and then is recycled through a weir filter system back into the water tank, making the Wash Station Mobile environmentally friendly. The compact, ultra quiet Quill Vogue Wash Station Mobile is safe (NRTL/MET certified), reliable and easy to use, so design engineers can clean their Polyjet 3D prints with ease. No mess, no fuss, just wash and go.

KEY FEATURES

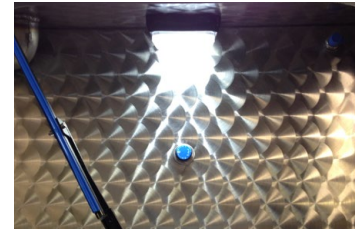

Wide angled fan jet for super-fast support material removal

Powerful concentrated precision jet for complex geometries

Range of water pressures (0-50bar/725psi) is available to operatives through the pressure control valve

Low energy LED lighting, robust wiper system for improved visibility and circular polished stainless steel construction for system longevity

SPECIFICATION

- Footprint: L640mm x W610 x H1520mm
- Internal Chamber: L320mm x W520mm x H530mm
- Door Opening: W170mm/270mm x H280mm
- Water Tank: 2 x 25 litres
- Weight: 140kg (fully laden with water)

SITE REQUIREMENTS

- Power Supply: UK - 240volt AC/50Hz/1.6kW single phase/13amp. USA - 110volt AC/60Hz/1.6kW single phase/15amp. RCD protected socket required.
- The Quill Vogue Wash Station Mobile is a “closed” system that contains 2 x 25 litre water tanks that require emptying and refilling on a daily/weekly basis depending on usage. Operators must ensure they comply with local government discharge guidelines.

Easy clean filter system recovers solid support material at 3 separate filter stages down to 1mm

Quill Vogue Wash Station Mobile is a “closed” system containing 2 x 25 litre water tanks making it environmentally friendly

Acoustic foam sound proofing ensures the Quill Vogue Wash Station is as quiet as a normal conversation at only 60dB

Easy to use foot operated controls
